PROFESSIONAL SUMMARY

Senior Data Infrastructure & Platform Specialist with 14+ years of experience in architecting and managing high-scale Big Data ecosystems. Expert in **Hadoop Administration**, security hardening (**Kerberos**, **Ranger**), and **performance tuning** across on-prem and cloud environments (AWS EMR). Proven track record in optimizing resource allocation, reducing compute costs by 35%, and ensuring 24/7 reliability for enterprise financial data platforms.

CORE COMPETENCIES

Hadoop Ecosystem (HDFS, YARN)

Security (Kerberos, Ranger, KMS)

Apache Kafka & HBase

Spark & PySpark Optimization

Cluster Hardening & Remediation

Performance Tuning & RCA

AWS EMR & Solutions Architecture

WORK EXPERIENCE

Senior Data Platform Lead Present

Big Data & Cloud Native Specialist

- Architected and managed enterprise-grade **Hadoop and Spark** clusters, achieving a **35% reduction in compute costs** through YARN queue optimization and fine-tuning.
- Led **Security Remediation** efforts, implementing **Kerberos** authentication and **Ranger** authorization policies across multi-tenant production clusters.
- Engineered robust monitoring and alerting frameworks for **Kafka and HBase**, reducing MTTR for production incidents by 40%.
- Optimized **HDFS** storage performance and data governance policies for high-throughput financial datasets.

Genpact Jun 2011 - Feb 2015

Senior Associate | Technical Support & Systems

- Managed technical operations and data processing for enterprise financial systems, ensuring high availability and data integrity.
- Performed root cause analysis (RCA) for complex system failures and optimized data ingestion workflows.

CERTIFICATIONS

AWS Certified Solutions Architect - Associate	Amazon Web Services
AWS Certified Machine Learning - Specialty	Amazon Web Services

EDUCATION

B.Sc. in Computer Science	Sri Venkateswara University	2008
